

# Together for the climate

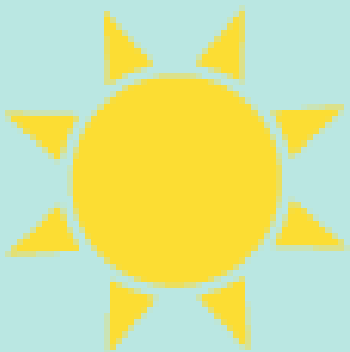

activating and networking  
citizens in Schleswig-Holstein

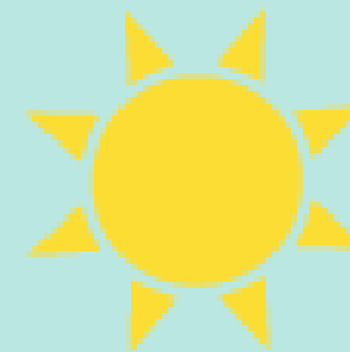

Felicia Hofstätter

**bewirk**   
*Gemeinsam fürs Klima.* 

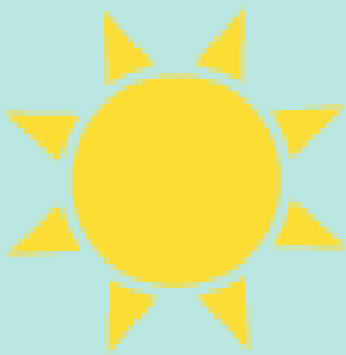

# the initiative bewirk

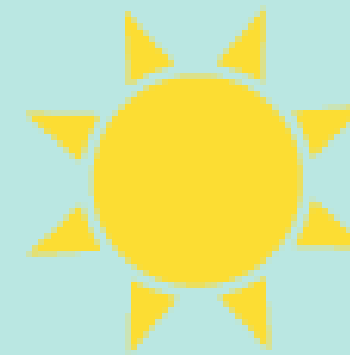

bewirk.sh - we support citizens in Schleswig-Holstein to tackle together climate protection in their own neighborhood or community

- **workshops on site**
- **online learning world**
- **collegial advice**
- **state-wide networks**

# our networks for citizens

**community solar systems**

**DIY group for plug-in solar panels  
and rooftop solar systems**

**Neighborhood solar consulting**

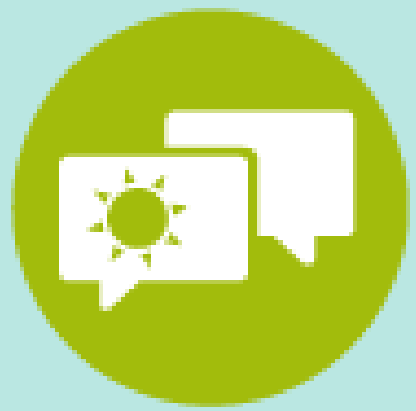

**heating**

# Projects to copy

## Neighborhood solar consulting

- Free, neighborly advice on solar roof systems
- Volunteer citizens are trained to provide advice
- Free training via bewirk (and help with the first steps to found a local group)

# Projects to copy

## **DIY group for plug-in solar panels**

- DIY community: support each other with selection / installation / registration / maintenance
- Advice and pool of volunteers who support individuals with the construction

Bild: SolarINI Lauenburg

# Projects to copy

## Balcony solar self-build communities

- a mobile balcony /plug-in solar panel to look at and try out

# Projects to copy

## **Solar parties**

- Invite neighbors and friends
- Present your own solar system (roof or balcony)
- talk about successes and obstacles
- or: information day in the community with a talk, lots of experience reports and hands-on systems

Bild: SolarIni Lauenburg

# Projects to copy

## **DIY group for rooftop solar systems**

- DIY group for rooftop solar systems for your own (or a friends´) house
- by lay groups, instruction and acceptance by a specialist
- Handbook for community solar self-construction in Germany (and Switzerland)
- implemented by: SoLocal Energy (Kassel), Bremer Solidarstrom, Solisolar Hamburg

# Projects to copy **community solar systems**

- Group of solar enthusiasts
- Goal: to install more photovoltaics on (public) roofs
- e.g. roofs of schools, gymnasiums, community centers, etc.
- Possibly founding a cooperative, GbR, GmbH as operator of the solar systems

# Mentoring program

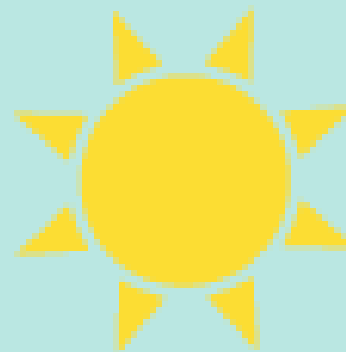

Supporting the start-up phase of local heating initiatives for a communal heat supply

- Support during the start-up phase
- Implementation of first steps
- Learning from active and experienced mentors
- especially for small municipalities

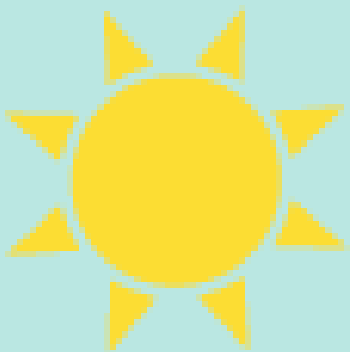

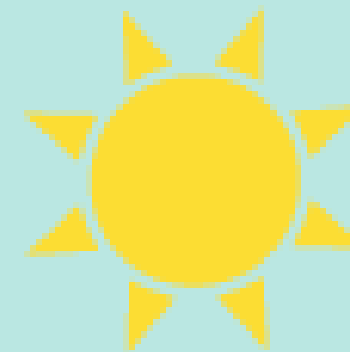

# networking

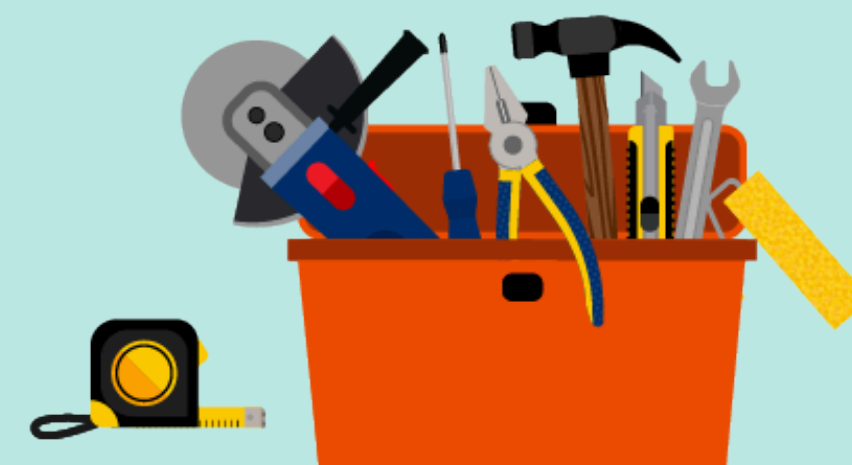

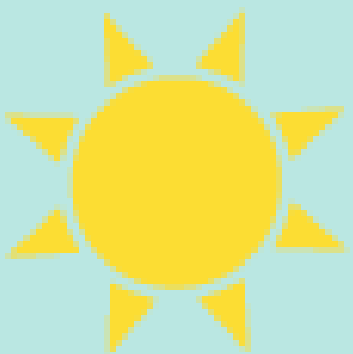

# offered courses

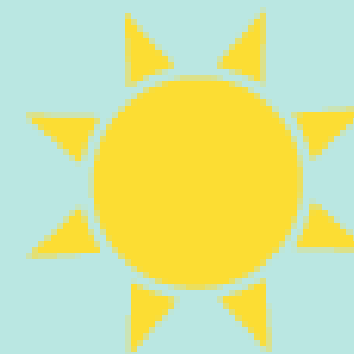

- **five excursions** to good examples of the solar and heating transition
- **training for climate groups** for methods to build up a strong local climate group
- **DIY course for rooftop solar systems**
- **mentoring program** to support the start-up phase of local heat initiatives for a community heat supply on site

# Thanks for your attention!
